
Overview

This standard covers the competencies you need to provide information and guidance to meeting organisational compliance in the business and to ensure regulatory and site quality requirements are in place and in accordance to current best practices, including Good Manufacturing Practice (GMP) to maintain compliance.

You will be required to support and input to the development of strategies and systems to ensure products and services meet the requirements of the organisational compliance, appropriate regulatory, product licenses and internal and external procedures for carrying out operations within life science environments.

This standard has been developed for persons responsible for regulatory activities whilst working in the life science sector. You are responsible with other members of the regulatory and quality teams for ensuring that all operations and procedures are processed and maintained in line with appropriate data security, regulatory, site and product license requirements.

Performance criteria

- You must be able to:*
- P1 identify and evaluate the regulatory and legislative activities required to meet the site operating, product license and marketing authority requirements
 - P2 support and input to the development and design of regulatory strategies for relevant product quality and safety activities
 - P3 support and input to the development of strategies for addressing risks and license issues
 - P4 coordinate, support and communicate the plans for implementing licensing activities for all relevant regulatory business areas
 - P5 monitor and maintain records on all change management related to regulatory changes to company processes and systems
 - P6 provide reports and documentation in line with an communication strategy with regulatory authorities
 - P7 evaluate and ensure the effective use of the reporting process and ensure appropriate audits are successfully completed
 - P8 review all relevant licensing agreements, communicating and recording compliance and non-compliance in the appropriate organisational record system
