

## Carry out site measurements and evaluations

---

### Overview

This standard is about carrying out site measurements and evaluations. It includes inspecting, recording, and disseminating information on site conditions relating to construction and allied occupational work activities.

This standard will also involve interpreting information, adopting safe, healthy, and environmentally responsible work practices, selecting, and using materials, components, tools and equipment, minimising damage, and working within the allocated time, in accordance with organisational requirements which are equal to or exceed current statutory and legislative requirements.

This standard is for people working in the construction industry and can be used by operatives, supervisors, and managers.
