

## Overview

This standard is about moving and handling goods in logistics operations, including the safe use of equipment, where required. It includes identifying potential hazards and the process of lifting, transferring and setting down goods.

This standard is relevant to all operatives at every level in logistics operations. Operatives could, for example, be working in warehousing and storage, removals, transport or freight forwarding.

## Performance criteria

### *You must be able to:*

1. identify the **goods** to be moved and handled as part of the logistics operations, and confirm they are suitable for moving
2. confirm that the area is safe and secure for the movement and handling of **goods**
3. identify hazards in moving and handling the **goods**, and take action to minimise risks
4. confirm the location for the positioning and setting down of **goods**, in accordance with organisational requirements
5. confirm that the **goods** are suitable for manual handling or that the correct equipment is selected, prepared and is operational
6. identify and use the **personal protective equipment (PPE)** relevant to the moving and handling of **goods**
7. use the required methods to move and handle **goods**, in accordance with organisational procedures
8. transfer **goods** to their designated location without loss or damage
9. position and set down the **goods** in the designated location
10. place the **goods** so that they can be identified and accessed
11. identify and respond to problems with the **goods** during moving and handling operations
12. return any equipment used to move and transfer the **goods** to its original position after use
13. record the work carried out, according to organisational procedures
14. P14 comply with organisational procedures and the relevant **legal, safety and operating requirements** relating to the movement and handling of **goods**
