
Overview

This standard is for those who assess fire risk for the responsible person or their designated representative. It sets out the skills, knowledge and understanding for you to liaise with the responsible person or designated representative, to obtain information and data about the premises to be assessed. This includes its occupants, and other relevant information that will provide background details on the current level of fire preparedness and contribute towards the assessment of fire risk. You will also plan how the Fire Risk Assessment will be carried out.
